
Organisation Overview

Name: Entrepreneur Mentor site

History: The website “**Entrepreneur Mentor site**” was founded and created in 2020 during Covid 19 where there was a rapid growth of Influencers and small businesses online via **TikTok** and **Instagram**. However, where some individuals with the same goal could not succeed in their careers hence the creation of the site to help young black people who wants to brow their businesses while networking and exposing themselves to different opportunities and collaborations

Mission: Many young entrepreneurs want to grow their personal brands, businesses, or creative careers but lack exposure and guidance. Creators, entrepreneurs, photographers, videographers, and designers have the potential to grow their businesses but because there are limited resources that could aid in supporting them. The purpose of this platform is to identify such individuals, analyse their digital presence, and provide strategic guidance to improve visibility, structure, and professional opportunities. The website will then function both as a mentoring site and as a showcase for entrepreneurs and creators, teaching them how to present themselves effectively in the digital space.

Vision: The long-term vision is to create a platform that:

- Mentor entrepreneurs and creators
- Build strong personal brands
- Connects individuals with business opportunities
- Provide exposure to underrepresented communities
- Create a network of successful entrepreneur who support the next generation

Target audience: The target audience of the platform will be young entrepreneurs/business owners based in Soweto seeking digital expansion as it is often underestimated despite having large numbers of talented individuals, creatives and of course entrepreneurs with strong potential. Many creators from this community lack mostly exposure or opportunities to present their work to a wider audience. Therefore, this platform aims to highlight and support these individuals by giving them the tools, mentorship, and exposure

The inspiration behind this initiative is rooted in personal experience growing up in Soweto and witnessing the talent and potential within the community. Many people underestimate Soweto and the opportunities that exist there. However, the community contains a large number of creative individuals who simply lack the exposure and mentorship needed to grow. By focusing on this area, the platform aims to help uncover hidden and create pathways for entrepreneurs and creators to succeed.

Website Goals and Objectives

The aims and objectives of the website will provide mentoring and strategic guidance to help individuals improve their online presence and professional positioning.

The platform will:

1. Analyse individuals' social media accounts and online presence
2. Identify missing elements such as contact details, brand messaging and page structure
3. Provide guidance on separating personal and professional identities online
4. Help creators and entrepreneurs develop a clear brand identity
5. Connect creators with opportunities such as brand collaborations, sponsorships, and investors

For instances, users could be advised to maintain the following:

- a. A personal page that showcases lifestyle, personality and one's daily life
- b. A professional page focused strictly on business services, portfolio work and business inquiries

This then separation allows brands, clients, and sponsors to clearly understand what the individual offers professional. Furthermore, the platform will function primarily as a mentorship ecosystem for aspiring entrepreneurs and creators.

Additional goals:

- Build a professional brand
- Communicate their value
- Engage with targeted audience effectively
- Network with industry professionals
- Develop business opportunities from their online presence

Current Website Analysis

Many creators and aspiring entrepreneurs struggle with:

- Poorly structured social media profiles
- Lack of clear brand identity
- No professional separation between personal and business content
- Limited exposure to people like “Influencers”, Investors, and / brand partnerships
- Lack of understanding of how to market themselves online nor how to interact with people.

For instance, a photographer or a videographer may post different types of content on the same page without a clear structure of what the page is actually able, which tends to confuse people as they cannot tell apart their personal account and work-related account. This can also confuse the potential clients because as mentioned the page does not clearly communicate their professional services. Similarly, individuals who are both creatives and professionals often combine personal lifestyle content with business-related content, which can make their brand appear unclear or unprofessional

Proposed Website features and Functionality
